

ORGANIC GEL AND DISPENSER

BIG D® **ORGANIC GEL** is made from organic material, with each fragrance designed to control a specific odor problem. When used with a fan dispenser, the gel will last 30 days. **ORGANIC GEL** is VOC compliant and ideal for patient care, restrooms, offices and food service.

ORGANIC GEL is a departure from the typical solvent-based deodorant. It is formulated from natural vegetation—plants, fruits, herbs and flowers—which have been known throughout time to selectively neutralize malodors.

The BIG D® **LIGHT-ACTIVATED DISPENSER** is designed to hold gel deodorants. The dispenser has a micro processor switch that can be set to OFF, ON or AUTO, and it is light-activated, so it turns itself off when there is no light in the room, allowing more efficient use of batteries and odor control products. The LED indicator informs you the unit is operating. Constructed of sturdy ABS plastic, it has a sealed motor for long life. The **LIGHT-ACTIVATED DISPENSER** operates on one or two D batteries. One carbon battery will last 30 days, two carbon batteries will last 120 days, and two alkaline batteries will last up to 180 days. The dispenser covers 4,000 cu. ft. of space.

LIGHT-ACTIVATED DISPENSER

PRODUCT NO. 077700

Packed individually - Weight 1 lb.
20 per shipping case - Weight 30 lbs.

ORGANIC GEL

PRODUCT NO.	FRAGRANCE
