

VORTEX

PASSIVE AIR FRESHENER SYSTEM

The **VORTEX** Passive Air Freshener System features a refill with quick and easy installation. Simply twist the base until you hear it **CLICK**, and the fragrance is released onto the internal wick. The audible **CLICK** means the refill has been activated and sealed against leakage.

With **VORTEX**, get up to 60 days of powerful fragrance that fights odor at the source. Just set it and forget it! The passive system does not require batteries or any other power source to operate. Fragrance covers up to 6,000 cubic feet, or an average 2-3 stall restroom. Refills are VOC compliant and made in the U.S.A.

VORTEX REFILLS will fit your existing dispensers for an easy switchover, or try a custom fit with the **VORTEX MINI DISPENSER**. Its compact design is perfect for discreet placement in small spaces. The circular dispenser base holds the refill in place while the dispenser cover swings up and down for hassle-free servicing. The dispenser case is durable with an optional lock to prevent vandalism.

NEW!
